

# AREA OF TRIANGLES

## Area of a triangle.

b = base  
h = height

$$A = \frac{1}{2} (b)(h)$$

$$A = \frac{1}{2} (6)(7)$$

$$A = \frac{1}{2} (42)$$

$$A = 21 \text{ in}^2$$

After you multiply the base and the height together, take one-half of your product and that is your answer!
