

Change The Decimal Into A Percent

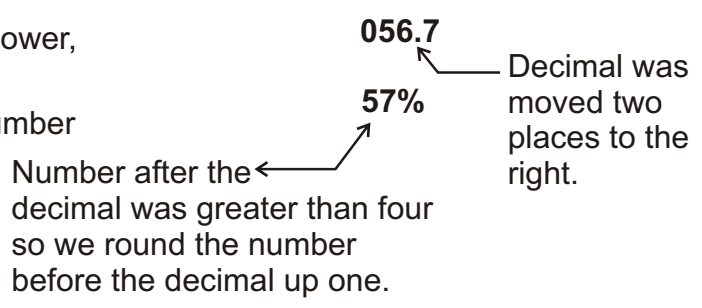

Step One - Move the decimal point two places to the right.

Step Two - Round to the nearest whole percent.

If the number immediately after the decimal is four or lower, the number before the decimal stays the same.

If the number after the decimal is five or higher, the number before the decimal goes up one.

Example: 0.567

Directions: Change each decimal to a percent. Round to the nearest whole percent.
