

INTEGER MOVEMENT

Directions: Using the number line provided for each problem, show the movement of the given integers by drawing arrows originating from zero.

Example: $-8+12 =$

4

The first integer was -8 so move in a negative direction eight spaces.
The second integer was 12 so move in a positive direction 12 spaces.
The number you land on is your answer.

1) $-13 + 13 =$

2) $-14 + 14 =$

3) $5 + 8 =$

4) $-9 + 5 =$

5) $8 + 6 =$

6) $-11 + 3 =$

7) $-15 + 20 =$

8) $10 + 3 =$

9) $14 + 7 =$

10) $10 + (-14) =$

11) $-9 + 10 =$

12) $-5 + 2 =$

13) $8 + (-13) =$

14) $-10 + 20 =$

15) $-5 + 15 =$
