

Nearest Whole Dollar

Example: Round \$46.78 to the nearest whole dollar.

46 is the whole number before the decimal.

the 46 will either stay a 46 or go up to a 47.

If the first number after the decimal is 4 or lower, then the whole number will remain the same.

If the number after the decimal is 5 or larger, than the whole number will go up one.

Because the number after the decimal is 5 or larger, the whole number of 46 will go up to 47.

$$\$46.78 \approx \$47.00$$

Directions: round each of the following money values to the nearest whole dollar.

1) \$34.21 \approx \$34.00 2) \$2.04 _____ 3) \$20.98 _____

4) \$4.51 _____ 5) \$67.01 _____ 6) \$90.54 _____

7) \$6.24 _____ 8) \$109.65 _____ 9) \$9.10 _____

10) \$46.33 _____ 11) \$11.64 _____ 12) \$5.43 _____

13) \$ 20.54 _____ 14) \$ 21.89 _____ 15) \$9.01 _____

16) \$ 21.87 _____ 17) \$1,292.78 _____ 18) \$342.34 _____

19) \$57.65 _____ 20) \$2,002.02 _____ 21) \$2.32 _____
